

Laboratory Exercise

Online Registration (Part 1)

Objective:

At the end of the exercise, the students should be able to:

- Write a program that incorporates classes, objects, and methods.

Software Requirements:

- XAMPP 8.0.3 or higher
- Visual Studio Code

Procedures:

1. Create a folder named **LastName_FirstName_Lab6** in the **htdocs** folder that is located on the XAMPP folder.
2. Create an online registration form based on the table below. You may use the **democlass.php** file as a reference.

Inputs	Required
Last Name	*
First Name	*
Middle Initial	
Age	*
Contact No.	*
E-mail	*
Address	*

3. Take note that all the required inputs should have an asterisk in the Online Registration Form.
4. Create another PHP file that will display the output of the entered data in the index.php file.
5. Within the index.php file, create a class named **FormInfoClass** and create a getter and setter for the given inputs.
6. Run the program to check the output.
7. Inform your instructor once you're done. Save a copy of your work for the next lab exercise.

Grading Rubric:

CRITERIA	PERFORMANCE INDICATORS	POINTS
Correctness	The code produces the expected result.	30
Logic	The code meets the specifications of the problem.	30
Efficiency	The code is concise without sacrificing correctness and logic.	20
Syntax	The code adheres to the rules of the programming language.	20
TOTAL		100
